

Online resources available

'Oak National academy' have high quality learning resources for daily Maths and English lessons. These resources can be found on their website with a video which includes activities for children to complete as they are watching. The English lessons include grammar, punctuation and spelling activities.

- If you are enjoying the **White Rose maths and Hamilton trust English activities**, please continue using these. Children from Year 2 are now on Summer week 5 maths lessons and week 6 English lessons. Please carry on with the work based on Katie Morag.

These online resources are only suggestions, please feel free to dip in and out of them if you wish. Alternatively, your child might wish to complete some topic-based activities listed below.

Practical maths ideas

Shape

Some work on 3D shapes would be good. Let the children look around the house and find and identify the many shapes. There are lots of "nets" available on line. If you search for 3D nets you will find some which can be printed. The children can create their own nets and use any completed 3D shapes to create models.

Time

It would be good if you could continue to encourage to keep a "time diary" highlighting the things they do in a day and the times when they do them. Children can also undertake set tasks like "tidying bedrooms" when they can estimate how long it will take and then time themselves. There are lots of activities, I am sure they can undertake.

Topic based activities

As in year 2 we will be learning about the different continents and oceans of the world it would be good to look at what lives in the oceans. Continuing on the theme of Oceans the children could research vessels which use the oceans, from tiny rowing boats to giant liners and oil tankers.

You could use BBC Bitesize and Espresso to research your sea/ ocean creatures. There are also David Attenborough resources on line.
