

### Online resources available

'Oak National academy' have high quality learning resources for daily Maths and English lessons. These resources can be found on their website with a video which includes activities for children to complete as they are watching. The English lessons include grammar, punctuation and spelling activities.

- If you are enjoying the **White Rose maths and Hamilton trust English activities**, please continue using these. Children from Year 2 are now on Summer week 4 maths lessons and week 6 English lessons.

These online resources are only suggestions, please feel free to dip in and out of them if you wish. Alternatively, your child might wish to complete some topic-based activities listed below.

### Practical maths ideas

If you are able to do any cooking it would be good to look at the packages of the ingredients and find the weight. Also measuring out ingredients helps to develop an understanding of weight and capacity. Of course eating the final creation can be fun too.

#### Time

It would be good if you could encourage children to keep a "time diary" highlighting the things they do in a day and the times when they do them. Encourage them to work out how long they spend at each activity.

Keep up number skills with times table, addition and subtraction activities.

### Topic based activities

As in year 2 we will be learning about the different continents and oceans of the world it would be good to look at what lives in the oceans. Choose a favourite sea/ ocean creature to draw and describe. Make a list of creatures found in the oceans

You could use BBC Bitesize and Espresso to research your sea/ ocean creatures. There are also David Attenborough resources on line.
