Topic of the week: The solar system

ENGLISH:

- Planning and writing a story about an adventure to space / adventure in space. Remember to plan a beginning, middle and ending. You could think carefully about describing the setting using adjectives.
- Descriptive writing- find a picture of a planet / space and use a variety of adjectives to describe what you can see. Remember to write in full sentences and include lots of detail.

MATHS: How far away are each of the planets from Earth? How long would it take to get to each planet in days.

SCIENCE: Create a poster explaining some amazing facts about the solar system. You could focus on one planet if you have a favourite. BBC Bitesize has some excellent information all about each planet in our solar system.

ART: Draw a picture of the solar system, thinking carefully about the different colours of each planet and how big they are in comparison to each other.

History: How did scientists discover planets? How long ago was this? Which planets have astronauts travelled to?

Computing: Create a PowerPoint all about the solar system, you could include facts that you have discovered whilst learning about this topic.
