

Online resources available

English

- The 'Oak National Academy' have excellent engaging English lessons that include grammar lessons. If you would like more specific grammar lessons please email me and I will send some to you.
- Hamilton trust home learning have high quality writing and grammar lessons available.

Maths

- White Rose maths- sheets can be found on the school website.
- Oak national academy- video lessons with teachers that children can join in with and complete activities from.

All of these activities are suggestions for your home learning. Please feel free to dip in and out of any resources you like. I would love to see any work children have done! Please contact me with any questions or with anything at all! I would love to hear from you.

My email is: aquigley@burleygate.hereford.sch.uk

Topic of the week: Weather around the world

English/ Geography:

- Choose 4 countries that have 4 different types of weather (4 different climates, you could research the difference between 'climate' and 'weather') for example, one country that is very hot, one that is very cold, one where it rains most of the time and one that has a mixture of weather conditions. Create a booklet / poster about these countries and include key facts such as: climate, animals that live there etc.
- It might be interesting to see if different animals like to live in different climates around the world. For example, does a lion like to live in cold places?

Science:

- Research the water cycle and create a poster showing how it works. BBC Bitesize have videos that could help.
- Research global warming- what is it? How is it affecting climates around the world? Are places getting warmer / colder?

Art: Create an observational drawing or painting of weather you can see outside your house, could be through a window, could be from the garden. You could see how the weather changes over the week.

The 'NASA climate kids' website has useful information about climate change that is fun to read and engaging.
